

## EASY MODE: NODE PORT

- ▶ No Load-Balancing and auto-failover
- ▶ Available Node-Port Range is 30000-32767
- ▶ No reserved ports (80, 443, etc.)

# ADVANCED MODE: LOADBALANCER

- ▶ Expensive (usually each LoadBalancer is billed separately, for existence & traffic)
- ▶ Certificate management is limited by the Cloud-Provider capabilities
- ▶ Requires a Cloud-Provider with LoadBalancer support
- ▶ TLS usually terminated at the LB
- ▶ Only works for domains, not paths
