

PLEASE DON'T*

ANYONE 'KUBECTL' APPLY - F' AND 'HELLO' INSTA

*I mean, it's fine on dev. But certainly not on prod

A WORD ON “KUBECTL APPLY -F” AND “HELM INSTALL”

PLEASE DON'T*

* I mean, it's fine on dev. But certainly not on prod

DON'T INSTALL ANYTHING MANUALLY ON YOUR (PROD) CLUSTER

- ▶ Not reproducible
- ▶ Leads to "Snowflake" Deployments
- ▶ Hard to audit (what, when, and why?)
- ▶ Keeping a historical record of changes is hard
- ▶ Almost impossible to do proper secrets management
