

A WORD ON "KUBECTL APPLY -F" AND "HELM INSTALL"

* I mean, it's fine on dev. But certainly not on prod

A WORD ON "KUBECTL APPLY -F" AND "HELM INSTALL"

PLEASE DON'T*

* I mean, it's fine on dev. But certainly not on prod

DON'T INSTALL ANYTHING MANUALLY ON YOUR (PROD) CLUSTER

- Not reproducible
- Leads to "Snowflake" Deployments
- Hard to audit (what, when, and why?)
- Keeping a historical record of changes is hard
- Almost impossible to do proper secrets management
